Thank you for purchasing one of our custom lighted photographers!

The circuits have been designed to operate on 9V-12V DC or AC. Any other type of input voltage will damage the circuit and void your warranty.

Do not connect figure directly to power source (or battery), please follow diagram below

Green Wires: Positive & Negative Photographer
Connection - See Note Below

Note: If the flash doesn't light up on the first try, please flip the green wires and test again. No worries, there will be no damage to the flash if the polarity is reversed.

East Coast Circuit warranties our products to be free of defects for a period of 1 year from date of purchase.

This Limited Warranty does not cover any damage, failure or loss caused by improper use of our product.

This Limited Warranty will be void if the product is ever used in a manner other than for its intended purpose or modified internally.
